Ray Camden posted an article today to provide a way for all of us to be able to help someone who has definitely gone "above and beyond" for the ColdFusion Community.

Joe Rinehart, the creator the Model-Glue framework, and one of the most important members of our community - posted a few weeks ago on his own **blog** that his wife, Dale, had been diagnosed with Multiple Sclerosis (MS). Some folks in the community have decided to set up a way for all of us to show our support and help Joe out. If you have ever used Model-Glue, or learned something from Joe, then I ask you to please consider making a donation. I have learned alot from Joe over the years and I know there are many others out there who can say the same. You can show your appreciation by sending a quick donation to:
