As my cohort, Ray Camden, pointed out on his [blog](#):

The folks at [Figleaf](#) have released a free ColdFusion 10 and JQuery Mobile Tutorial.

You can download it here:

[CF10 and JQuery Mobile Training](#)

The objectives for the course are:

- Define and use AJAX/JSON(P) web services using ColdFusion 10
- Define and use REST web services using ColdFusion 10
- Using REST services with jQuery Mobile
- Implement real-time communications with HTML5 web sockets
